AIRPORT TERMINAL ROAD CLOSURE: UPPER LEVEL DEPARTURES ROADWAY

*Traffic & Pedestrian Circulation Changes Expected
Two Terminal Roadways at ROC Closed through October 2018*

Beginning Friday, April 13, 2018 a temporary road closure will be in effect at the Greater Rochester International Airport (ROC) for **ALL Upper Level Roadway Departures Traffic**. The road closure will be posted and detour signs will direct **all vehicles** to drop off passengers flying out on the **Lower Level Arrivals Roadway** until the terminal canopy project is complete in October 2018. Passengers should expect lane reductions upon entering terminal property from Brooks Avenue.

Also, a temporary road closure is still in effect at the Greater Rochester International Airport (ROC) for **ALL Lower Level, Outer Roadway Traffic**. That road closure has been posted since October 2017 and detour signs have been directing **all vehicles** that normally use this roadway to use an alternate traffic pattern until the terminal canopy project is complete in October 2018.

These terminal roadway closures are necessary for the terminal entrance canopy construction to continue over the elevated roadway that traverses the front of the passenger terminal. This means that there is a reduction by two roadways that traverse the terminal and all traffic will be using one terminal roadway for both Departures and Arrivals.

Drivers are encouraged to monitor the following temporary adjustments:

Elevators and Escalators

- Located near each Lower Level entrance for passenger access to the ticketing lobby. Skycap assistance will also be available for departing passengers on the lower level roadway and to provide wheelchair assistance.

RTS, Rideshare, Taxi Cabs, Parking/Hotel Shuttles

- Located on the Lower Level Arrivals roadway during this period. Valet Parking services will be unavailable to passengers during this period however Premium Parking in the Long Term Ramp Garage is an alternative option. Passengers who park in the Long Term Ramp Garage will be able to access the ticketing lobby via the elevated walkway during the majority of this period.

Smart Phone Lot

- Due to increased congestion, drivers are encouraged to stage in the new Smart Phone Lot located PRIOR to reaching the terminal. Local law enforcement will be on site to keep traffic flow moving especially during peak periods.

Arrive Early

- As always, passengers are reminded to arrive at the Airport **at least 90 minutes prior to their departure times** and to follow detour signage during this period.

These roadway closures will remain in effect throughout the spring, summer and fall until the terminal revitalization project is complete in October 2018.

Weekly project updates can be found at www.rocrenovation.com.
