BROOKS PARTNERS WITH FRONTIER TO PROVIDE ENHANCED WI-FI SERVICE AT AIRPORT

Free High-Speed Internet Now available for all ROC Guests throughout the Terminal

Monroe County Executive **Maggie Brooks** today joined with representatives from Frontier Communications to announce newly enhanced, complimentary Wi-Fi internet service at the Greater Rochester International Airport (ROC). Free high-speed internet service for airport travelers and guests is now available throughout the entire facility.

“This announcement commemorates a ten-year partnership between our Airport and Frontier Communications,” said **Brooks**. *“Our Airport prides itself on providing passengers with a variety of terminal amenities that are both complimentary and user-friendly. Although this latest enhancement is especially timely with the busy Holiday travel season upon us, free enhanced Wi-Fi will certainly create a better travel experience for ROC users year-round.”*

High-speed Wi-Fi service has been expanded to the ticketing lobby, guest waiting areas, and the baggage claim. The former tiered-service option has been enhanced so service is free to all guests, while an improved log-in process offers a more user-friendly experience.

“We are very excited to announce that Frontier recently completed significant investments at the Greater Rochester International Airport resulting in a more robust network, greater bandwidth, and an overall enhanced Internet experience,” said **Phil Yawman**, Vice-President and General Manager of Frontier’s greater Rochester market. *“We also improved the Frontier Business Center, providing business travelers with complimentary Internet service plus new Mitel phones which graphically deliver rich applications, superior audio clarity and shared documents.”*

For more information, visit the Airport online at www.rocairport.com.
